Tokyo, Japan

SKILLS

- Python
- PyTorch
- TensorFlow
- OpenCV
- Hugging Face
- MLflow
- Kubeflow
- TensorRT
- CUDA
- AWS SageMaker

CERTIFICATIONS

AWS ML Specialty (2022)
NVIDIA Deep Learning
Institute – Computer
Vision (2021)
TensorFlow Developer
Certificate (2020)

LANGUAGES

- Japanese (Native)
- English (Fluent)

PROJECTS

FaceShield

Emotion-aware privacy tool
using custom CNN; deployed
in Sony cameras.

NeurIPS 2023 Paper

'Few-Shot Semantic
Segmentation via Cross-
Modal Attention'; 80+
citations.

PROFESSIONAL SUMMARY

AI/ML Engineer with B.Tech in Computer Science and 5 years developing production-grade machine learning systems. Specialisation in computer vision, NLP and MLOps. Experience deploying models at scale using cloud platforms and building end-to-end ML pipelines. Published 2 papers at NeurIPS.

WORK EXPERIENCE

ML Engineer – Computer Vision

[Sony AI, Tokyo](#)

Apr 2021 – Present

- Built object detection pipeline (YOLO v8-based) for real-time video analytics at 60fps.
- Reduced model inference latency by 55% using TensorRT quantisation.
- Deployed MLflow + Kubeflow MLOps platform; reduced model training cycle from 4 days to 6 hours.
- Co-authored NeurIPS 2023 paper on few-shot image segmentation.

Junior ML Engineer

[Preferred Networks, Tokyo](#)

Jun 2019 – Mar 2021

- Implemented BERT-based intent classification for robotic task planning.
- Built data preprocessing pipelines handling 500GB+ daily sensor data.

EDUCATION

B.Tech – Computer Science & Engineering

University of Tokyo · 2015 – 2019 · GPA: 3.95/4.0 — Dean's List

NLP Research Exchange

Stanford University (6 months) · 2019 · Visiting Researcher
